Description: Standard Buffer Solution 10.0 pH @ 25°C  
Part Number: 02.0034  
Lot No: ML-P10-1226  
Certification Date: September 17, 2014  
Expiration Date: March 5, 2016

**Test Methods**
- All analytical balances are calibrated by an ISO/IEC 17025:2005 accredited calibration laboratory. All balances are checked prior to use using an in-house procedure. Weights used for testing are traceable to NIST.
- All thermometers are NIST traceable through reference temperature probes that are calibrated by an ISO/IEC 17025:2005 accredited calibration laboratory.
- Measurements are taken at 25°C ± 0.25°C using EPA Method 150.1 and are temperature compensated.
- Uncertainty is calculated using an Expanded Uncertainty U=kuc (k=2.00).

**Intended Use**
This standard solution is indicated for use as a secondary standard for calibrating pH meters.

**Hazardous Information**
Please refer to the Material Safety Data Sheet available on our website for information on this material.

**Stability and Storage**
Protect from temperature extremes. Discard if solution has been frozen. Do not return used solution into the container. Keep cap tightly sealed when not in use. Discard 90 days after opening.

**Conformance Statement**
Mesa Laboratories Inc certifies that the above referenced product was tested using the N.I.S.T. traceable standards listed above, and meets or exceeds all published specifications as printed on the product label.
